Capstone proposal

Place the problem on the card, then argue for the cheapest thing that works. One page.

The problem One sentence, with a verb. What goes in, what should come out.

Where it lands on the card The place (1 to 7), and the one question that decided it.

Steps Five at most, in order. What gets built or changed.

Error budget What one wrong answer costs, and how many you can live with.

Cost To build, and to run per month.

Owner and off switch One named person, and how it gets turned off.
